

Launcher

Liquid Soybean Inoculant

Launcher Soybean is a liquid inoculant for Soybean (*Glycine max*) crop. It is formulated with specially selected strains of *Bradyrhizobium japonicum* which can provide effective nodulation to enhance nitrogen-fixation

Crop

Soybean (*Glycine max*)

Product Specifications

Basic Component:	<i>Bradyrhizobium japonicum</i>
Product Type:	Direct liquid application
Minimum Bacteria Concentration:	$\geq 4 \times 10^9$ CFU/mL
Microbiological Purity:	Free of contamination microorganisms
Type of Application:	Seed treatment or In-furrow
Seed treatment:	2 fl. oz./CWT (1,3 mL/kg)
Packaging:	40 fl. oz. (1,18 L) 400 fl. oz. (11,83 L)
Shelf Life:	2 seasons
On-Seed Life:	Up to 30 days

In Furrow:

Application rate: 0.5 fl. oz./1000 ft (5 mL/100 m) of row. The product needs to be applied diluted with non-chlorinated water at total volume of 27-185 L/ha or 3 - 20 gallons/acre.

Row width	Recommended Inoculant rate
15" (38 cm)	17.5 fl. oz./ac (517 mL/ac)
20" (51 cm)	13 fl. oz./ac (385 mL/ac)
30" (76 cm)	8.5 fl. oz./ac (250 mL/ac)
36" (91 cm)	7.5 fl. oz./ac (220 mL/ac)

Features:

Launcher Soybean is an economical liquid inoculant, which guarantees effective biological nitrogen fixation.

For best results:

- Use before expiration date.
- Once opened, use the entire contents of the container within 24 hours.
- Shake the container well before use to ensure a uniform suspension.
- Protect treated seed from direct sunlight.
- Contact RIZOBACTER's representative for specific recommendations.
